# EXPLORE A NEW DIMENSION IN CLEARING SAW AND BRUSHCUTTER DEVELOPMENT

## BRUSHCUTTERS & CLEARING SAWS

### Performance and safety in perfect balance.

Powerful and well-balanced clearing saws and brushcutters are created to handle tough, long and demanding shifts. The engine is designed to provide maximum power with low vibration and reduced fuel consumption. The transmissions are specially developed for forestry clearing in order to maximize your performance. All features are combined to create forestry clearing saws that are strong, easy to handle, and make the toughest of forest work easier.

- Efficient X-Torq® Technology
- Commercial-Grade Power
- Effective Vibration Dampening (Low Vib®)
- Smart Start® Technology

Balance X  
Harness

Balance XT  
Harness

#### An ergonomic Husqvarna harness will spread the load and help you work more efficiently.

A harness will improve working movement, enable you to manage your job in a safer way and take the strain from your body. Using a machine the right way also makes a difference in how it handles and the results you experience. Our ergonomically designed harnesses effectively spread the machine's weight to maximize balance – making the machine feel lighter, more maneuverable and less strenuous to work with.

Your dealer can recommend the best harness for your needs. Visit [www.husqvarna.ca](http://www.husqvarna.ca) to find a dealer near you.

#### 3-IN-1

With 3 kinds of cutting equipment, your brushcutter becomes 3 machines in one.

Harness and grass blade included with all brushcutters.

#### HIGHER EFFICIENCY

Higher blade speed means greater cutting capacity and Smart Start® ensures quick starts with minimal effort. Resistance in the starter cord has been reduced by up to 40%.

#### ULTRA-EFFICIENT X-TORQ® TECHNOLOGY

X-Torq® combines high performance with better fuel economy and lower exhaust emissions. Now you can work more comfortably and economically.

#### ERGONOMICALLY SUPERIOR

Engines are equipped with very effective anti-vibration dampeners that let you work more comfortably during longer shifts.

## HUSQVARNA 535FBx IS THE FIRST APPLICATION FOR TOP SPACING.

The design provides total load distribution with the engine is located in a harness on the user's back. The cutting equipment is hinged in a flexible suspension for increased comfort and flexibility, making work easier and offering a high degree of precision.

- Fuel Pump for Easy Starting
- Adjustable, Automatic Chain Lubrication
- Detachable Shaft for Easy Transport and Storage
- Adjustable Handle Bar for Best Comfort
- Auto Return Stop Switch

### FLEXIBLE SAW SUSPENSION

The saw has a flexible suspension for less fatigue and increased comfort.

### X-TORQ® ENGINE

Delivers lower fuel consumption and reduced exhaust emission levels in accordance with the world's most stringent environmental regulations.

### TOTAL LOAD DISTRIBUTION

The harness and suspension frame provide total load distribution.

### LOW VIB®

Provides effective anti-vibration dampening that helps reduce operator fatigue when working in high situations and during long shifts.

**Enjoy improved efficiency, comfort and safety with Husqvarna accessories.**

The right accessories, protection gear and clothing will make your work safer and more efficient. Our range of accessories for clearing saws and brushcutters includes everything you need, resulting in real benefits for your overall well-being, working conditions and above all, productivity.

\*All horsepower values are rated by the manufacturer. The power rating of the engines indicated is the average net power output (at specified RPM) of a typical production engine for the engine model measured to SAE standard J1349/ISO1585. Mass production engines may differ from this value. Actual power output for the engine installed in the final machine will depend on the operating speed, environmental conditions and other variables. Specifications and pricing subject to change.
